Our Technology Partners:

By virtue of extensive engagement with marquee enterprises and leading technology players, Dotcad provides vital insights on technology, helps choose the right technology and delivers the desired outcome to your business. The ability to provide such insights stems from our deep and wide experience in infrastructure solutions and ensures an enriching engagement for the stakeholders. Taking the discussion beyond what is published on the internet, our customers expect us to help them select technology, evaluate the ensuing solution and understand the returns to business.

**Ensuring a Long term Stable Relationship:**

Our customers treat us a long term partners, thereby ensuring that we remain invested in them. Likewise we maintain strong and healthy long term relationships with our OEM vendors in the process, creating a compelling ecosystem which is beneficial to all.

We assure that our engagements are professional and the time spent with us provides value. Once we begin a business relationship, we remain committed and serve our customers with integrity.

A Partner with Deep Insight

A technology partner that understands the core business with the ability to provide deep insights that helps you remain competitive, is what most customers today find in us. Dotcad has been a loyal technology partner for marquee businesses by helping them on their digital transformation journeys. With over two decades of experience, our domain experts, architect and execute IT solutions around business needs aimed at reducing time to market, digitising processes, compliance, leveraging cloud for efficiency or exploring options for consuming IT.

Connect to Dotcad when..

Start small :
Take your early steps in creating an efficient IT infrastructure which is responsive to business needs which operates at lower costs. Leverage the advantages of server and desktop virtualisation and weave in a "any device, any application, anywhere" as you complete the journey. Our proficiency in leading virtualisation technologies and hyperconverged infrastructures are being leveraged by multiple enterprises as they invest in agility and flexibility.

Refresh your technology : Whether it is revamping your network infrastructure or planning a consolidation of aging servers and diverse data stores, our composite approach helps your organisation to define and deploy an IT roadmap best suited for your growing business. Go wireless, consolidate, virtualise, secure and manage, provide mobility or execute your cloud strategy. Dotcad is your single stop to execute your IT strategy.Our experts will help to align IT with your business goals and create a platform which helps you to deploy business critical applications with speed.

Invest for growth :
Your business is rapidly growing. Users and locations are being added at a rapid pace needing urgent deployment of resources and hece building optimal capacities. Protection of data and availability of resources during a disaster are your key priorities. We provide industry proven solutions around the areas of branch, mobile and remote connectivity and disaster recovery.

Ascertain if cloud the answer :
Is your management creating pressure to leverage the cloud? The efficacy of cloud depends on the nature of your workloads. Whether private or public, it is now possible to deploy infrastructures with public cloud like experience and economies, on premises too. Work with us to plan your hybrid cloud strategy to meet the right fit for your business.

Look for alternate consumption methods :
IT budgets are under downward pressure. Every purchase is evaluated carefully on whether to incur capital expenditure or to go for an operating expense model. Dotcad provides a range of creative financing solutions to help you meet your financing and investment objectives. Operating leases, Rentals or Opex based managed services such as print or cloud are a part of our portfolio, giving you options from Capex based to Opex based IT consumption.

Put it all together : Services:
Whether consulting, design and integrate or manage and operate, Dotcad provides a rich portfolio of services in combination with our service partners to ensure that your investments are protected, available and optimal. This is an exciting portfolio which will enable you to focus on innovation projects thereby leaving the day to day administration and upkeep to us. This is a wide portfolio and hence please write to us for any customised service requirement.

Procure runrate IT:
Not every IT requirement is a project. Your regular needs for devices or infrastructure, are handled by a dedicated team and quickly turn around your requests for prices and deliveries.
