

Company Profile

Excellence in IT services

Dotcad is an IT infrastructure and technology services company serving large enterprises to mid-market customers. We offer the full spectrum of IT services and solutions that encompass assessment, planning, design and implementation to help align your IT to your business demands.

Since our founding, more than 3 decades ago, we have grown from a humble products company to a full-menu IT services company. Our deep understanding of infrastructure, associated costs, implementation skills, and financing, sets us apart and makes us unique in our ability to provide templatised and customized IT solutions as-a-service.

Shaishav Singh
(Founder)

Dotcad was founded in the year 1987, a period when the world was on the brink of a technological revolution. We were quick to realize the potential of emerging technologies and made the most of the opportunity to lead with innovation.

We are committed to being at the forefront of technology innovations and we keep our ears to the ground to stay in tune with the demand landscape. Dotcad has since evolved into a leading system integrator with extensive skills and has supported a growing number of customers with long-term engagements. My teams remain focused on delivering user experiences that are unparalleled in their quality.
